

IN EVERY ISSUE —

- 2** *Sooner Shorts* • News and Events
- 16** *The Big Idea* • How can physicians help Parkinson's patients when medications fail?
- 22** *Sooner Nation* • Victor Law excels in pharmacy and friendships
- 30** *Your Letters*
- 32** *Lest We Forget ...* • Jesse Lee Rader: OU Libraries' founding father
- 33** *Epilogue* • OU and Texas SEC Bound

On the Cover • Environmental engineering Ph.D. student M'Kenzie Dorman tests the alkalinity of a water sample from the Mayer Ranch passive treatment system near Tar Creek in northeastern Oklahoma. Dorman is one of many students working with Robert Nairn, head of OU's Center for Restoration of Ecosystems and Watersheds, to restore the contaminated waters of the Superfund site using renewable energy. *Story on page 4.*
