Co-ordinating Board Progresses

Three studies to guide it in any future action toward unifying education in state schools under the "Greater University of Oklahoma" plan have been ordered made by the coördinating board meeting early in January.

The three surveys include:

1. A meeting of registrars of all educational institutions to study methods of keeping registry office records with the view of adopting identical methods under the plan of unification.

2. A meeting of treasurers and auditors to study methods of keeping financial records with the view of adopting identical methods under the plan of unification. A representative from the state examiner's office and a financial expert from outside the state will attend

this meeting and contribute to the study.

3. A study of the needs for higher education in the state. Representatives of all Oklahoma schools will assist in this survey which will show the number of high school graduates attending colleges and universities. This study also will compare Oklahoma college attendance with that of other states, particularly those states in which educational institutions have been developed to a high degree.

That these three studies be made immediately was decided by representatives from twenty-three of Oklahoma's higher educational institutions. Work on the surveys will be started immediately, but no time limit on the completion of the studies has been set.
