THE TEN GRANDMOTHERS by Alice Marriott has received increasing acclaim since its publication. It is an understanding, dramatic history of the Kiowa Indian tribe containing incidents from four stages of the tribe's history, bound together by a loosely woven but moving plot. **\$3.00**

WESTERN WORDS by Ramon F. Adams contains 3,000 words and phrases from the range, cow camp and trail. It is the largest vocational glossary ever compiled on the language of the cattle business, which is so flavorful and distinct from that of the rest of the United States. **\$3.00**

OKLAHOMA: GUIDE TO THE SOONER STATE, compiled by the Federal Writers Project, has been revived after being out of print two years, is the only extensive guide book for Oklahoma. Note to the stay-at-home vacationer: It contains information on all the scenic and unique spots in the state. **\$3.00**

TRAMPLING OUT THE VINTAGE by Joseph A. Cocannouer is the well-told story of the eventful life of a teacher who tried to teach better farming in Oklahoma rural schools only to be blocked by the "cotton minds," farmers who would grow no crop but cotton. It may well be considered a document in American social history on a fundamental American problem. **\$2.75**

THE WESTERN JOURNALS OF WASHINGTON IRVING is a collection of the sparkling contents of five notebooks which Irving filled on his tour of the prairies, printed in full for the first time. This publication contains much of the spiciness and original wit lost in Irving's more polished account of a "Tour on the Prairies." **\$3.50**
