

Composed of more than eight times the area occupied prior to acquisition of the two naval bases in 1946, O.U. is spread out over an expanse of five and one-half miles in length. To the right, in aerial photo 1, is the Main Campus with the South Campus pictured in the upper lefthand corner. Near the center of the picture beyond the South Oval is Sooner City, 500 pre-fabricated cottages. To the left and slightly below the prefabs, which show up white in the picture, are the Nieman Apartments for married students, and Woodrow Wilson Center, housing for men. To the left of the Stadium is Sooner Courts with its 27 trailer houses occupied by married students. Between the South Oval and the pre-fabs the new four-wing dormitory for girls is being constructed. Construction was started recently, after this photo was made.

O.U.

Time has wrought many changes at O.U. Expanding with the age, the University is finding it hard to keep a building program going fast enough to accommodate the ever increasing enrollment.

With the acquisition of the North and South Naval Bases in 1946, the University increased its area by approximately eight times. Modifications of buildings on these two extra campuses have provided both housing and classrooms.

From the southern tip of the South Campus to the northern tip of the North Campus, the spread is five and one-half miles.

The School of Drama, Architectural Engineering, Aeronautical Engineering, Extension Division and University Laboratory School are among the main functions of the 1300-acre North Campus. Of the 65 buildings on that campus, only five are not in use.

The Naval Reserve uses two North Campus buildings, the National Guard, 9; University construction, 21; University housing, 21; storage and physical plant maintenance, 5.

Freshmen are more familiar with the 90 buildings on the South Campus than are other students. Freshmen courses as English, history, mathe-

Aerial photo 2 is the North Campus with its Westheimer Field. It is located approximately one mile north of Norman, just west of the interurban tracks. The interurban tracks may be seen in the immediate foreground, center, is the Extension Division Building.

Photo number 3 is the Research Building located across the street south of the Library. Number 4 is the new wing to Holmberg Hall which will house music practice rooms. Number 5 is the new Press Building located on the former parking lot west of the Fieldhouse. Photo 6 is a classroom building east of Residential Halls and south of the Research Building, Number 7 is an addition built on the east side of the Engineering Building.
