Fund Contributors' Number Doubled

A lot can be accomplished in six months.

A lot can be accomplished in six months.

As proof of the pudding, look at the Alumni Development Fund. In the January issue of *Sooner Magazine* a headline reads, "\$10.99—An Average Contribution." The story went on to say that a total of \$3,244.75 had been given to the fund in a period from July 1, 1949, to January 10, 1950. Contributors numbered 296 which figured the average contribution to be the amount stated in the headline.

But new figures released on the period from January 10 to June 15 show total contributions for this period at 483 and

amounting to \$13,296.75. That's an average of \$27.53 per contribution. Not a bad gain in any of the three departments for six months. A little more math shows that contributions for the past six months are \$10,000 higher than for the previous six.

It is not the higher average that make Fund officials beam. It's the increase in total contributions. They believe that each contributor is showing his interest in the school and is buying a share in the educational program of the University. Scholarships and other programs which could not be financed by individual alumni are now being made available.

The contributors who helped make the fine record for the past six months are listed alphabetically.
