Official Ballot

1954 Election of Executive Board Members, University of Oklahoma (Alumni) Association

INSTRUCTIONS FOR VOTING: This is your official ballot for the annual election of Executive Board Members of the University of Oklahoma Association for the year 1954. On the ballot are 12 nominees to fill four at-large memberships on the Board. To be counted, a ballot must show a vote for four candidates (Since all nominations are for at-large memberships, a vote for only one nominee would weigh the voting unfairly). Return the ballot to the Election Committee, University of Oklahoma Association, University of Oklahoma, Norman, not later than May 1, 1954. No ballots postmarked after that date will be considered. Only members of the Association may vote.

Name _____ Date _____

Address _____

Mail to the Election Committee, University of Oklahoma Association, University of Oklahoma, Norman, Oklahoma, not later than May 1, 1954.

3

men who are working for your comfort

Right this minute these men are working for you. And there are hundreds more on this Oklahoma Natural "team" working around the clock to assure you a dependable supply of natural gas.

The fellow on the left is a driller . . . a modern pioneer, with all of the technical advantages of today, searching ever deeper for additional reserves of natural gas.

The man in the middle? He's a pipeliner. One of the members of the transmission team whose job it is to keep gas moving through some 5,000 miles of high pressure pipe lines that lead from gas fields and underground storages to

your community.

The third man is a member of the distribution team. He's responsible for maintaining the miles of gas mains under your city's streets . . . providing dependable natural gas service to you and your neighbors in over 100 cities and towns served by your Oklahoma Natural Gas Company.

These three men—and the hundreds of others on the "team"—are working for you. It's their business to see that natural gas is always ready to do the many household jobs that only natural gas can do so well.
