HORIZONS OF GREATNESS

Continued from page 15

These are but examples of the many accomplishments made possible by friends of the University through their generous gifts. There are many other examples which would perhaps be just as impressive and we hope there will be many more in the future.

The University of Oklahoma enjoys a unique position among educational institutions of the Southwest. Because of its stable and intelligent administration the University has been able to demonstrate a capacity for leadership that few institutions can match. President George L. Cross has held his position since 1944 and his administration has been unparalleled by any other institution in the region for the successful recognition and treatment of educational problems.
