From Pipelines to Main Office

From pipeliner to president of an international organization is a long stride in the career of one man. But in 1926 Thomas L. Cubbage, '37eng, began his career as a pipeliner with Phillips Petroleum Company, and last September he was elected to head the International Institute of Synthetic Rubber Producers which includes 14 synthetic rubber companies in the United States, Canada, England and West Germany.

The purposes of the institute are to promote and further the interests of manufacturers of synthetic rubber poly-

mers and the interests of the public in manufacturing, engineering, safety, transportation and other problems of the synthetic rubber industry.

With this new position, Cubbage's influence on the petroleum industry becomes world-wide. He is also vice president and general manager of Phillips Chemical Company, Phillips Terminal Company in Texas, the chemical company's subsidiary, and Phillips Pacific Chemical Company in Washington.

When Cubbage took his first job with Phillips, he had just been graduated from high school. Family finances made college impossible at that time. On his pipeline job he worked nine hours a day, seven days a week at 45 cents an hour. After a year he decided to come to O.U.

By working periodically and attending school between jobs, Cubbage graduated in 1937, ten years after entering the University.

Promotions came fast for him after he returned to Phillips. In 1943 he was made assistant superintendent, and one year later, superintendent of the Plains butadiene plant, which was designed and constructed by Phillips under the World War II synthetic rubber program. In 1951 he was elected to his present position in Phillips Chemical Company.

Now residents of Bartlesville, the Cubbages have two children, Nancy, a freshman at O.U., and Tom Jr., a senior at Notre Dame in business and commerce, who plans to enter the O.U. College of Law next year.
