

Bell System instructor George Templeton, left, discusses maintenance problems of a teletypewriter printing unit with Henry A. Louz of Surinam, who has come to this country to receive advanced communications training.

Sharing our communications knowledge with new friends from other lands

Henry Albert Louz, shown at right in the picture above, is a communications technician from Paramaribo, Surinam (Dutch Guiana).

Mr. Louz is one of approximately 150 foreign nationals from two dozen different countries receiving technical training from the Bell Telephone System this year. The Bell System and a number of other American firms are cooperating with the State Department and the Agency for International Development in providing training to help these and other nations build their economies. Liaison agency for

the telephone industry is the Federal Communications Commission.

When Henry Louz's six months' course is over, he will return to his native land in South America to apply the latest in modern technology to problems in his field.

Henry is at the telephone school in Topeka, Kansas, studying all phases of teletypewriter service—the transmission of written information from point to point or via a network. It is training he could not get at home, and he is getting it side by side with Bell System employees.

At the same time, Henry is also learning about the American way of life. Through his new friends and acquaintances in Topeka he is meeting people, visiting their homes, seeing factories, museums, sports events. We hope he will return to Surinam with much more than a post-graduate course in communications.

We in the Bell Telephone System are proud of the good communications service that we provide at home—and we are equally proud to share abroad the know-how that makes fine communications possible.
